EXPERIENCE

Full-Stack Developer, *Skynet by DeCloud Labs*

Jul 2025 – Present

- Sole frontend engineer for **Skynet Workspace**, a B2B AI platform that deploys autonomous agents across business departments; own frontend architecture, development, and delivery end to end.
- Architected and shipped core product modules, including multi-model **AI Chat**, an **Agents** suite with a drag-and-drop agent builder, live dashboards, Mini Apps, and shared team memory.

Tech: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Zustand, TanStack, dnd-kit

Full-Stack Developer (Part-time), *Ada Insys*

Mar 2023 – Jun 2025

- Delivered end-to-end web applications digitizing manual workflows, including a government **Visitor Management System**.
- Built an **AI meeting-transcription tool** that generates live summaries using LangChain and LangFlow.
- Enhanced the usability of a recruiter **applicant tracking system** and added frontend features to a video platform.

Tech: React, Next.js, Vite, TypeScript, NestJS, Prisma, LangChain, LangFlow, Material UI, Tailwind CSS

FREELANCE EXPERIENCE

Full-Stack Developer, *PayStreet*

Apr 2025 – Jun 2025

- Spearheaded the migration of the payment system from **Wallex API v1 to v2**, improving transaction speed and reliability.
- Re-architected the client and server data flow to integrate the new endpoints cleanly across the platform.

Tech: React, TypeScript, Node.js, Express, MongoDB, Docker

Frontend Developer, *Aurk AI*

Jan 2025 – Feb 2025

- Engineered the complete frontend for Aurk AI, an AI and crypto platform, with responsive desktop and mobile interfaces.
- Optimized client-side performance and connected backend services for a fast, consistent user experience.

Tech: React, TypeScript, Tailwind CSS, shadcn/ui, dnd-kit

PROJECTS

Mamori | ETHGlobal Tokyo 2026

- Built an **on-chain options protocol** that prices and settles trades directly through Uniswap v4 liquidity, with no separate order book or oracle.
- Integrated 1inch Aqua so sellers back offers with wallet balance that stays liquid until a trade executes.

XPack | ETHGlobal HackMoney 2026 Finalist

- Designed a crypto-native **monetization layer for NPM packages** with per-device, per-user, and subscription licensing.
- Implemented USDC payments across EVM chains, with additional support for Sui.

PVPvAI | ETHGlobal Agentic Ethereum Finalist

- Created an **agent-driven prediction-market game** in which players influence AI agents' trading debates and wager on outcomes.
- Enabled automatic, trustless payouts through smart-contract settlement across co-op and PvP modes.

AWARDS

Finalist, ETHGlobal HackMoney (1,300 hackers, 81 countries)

Feb 2026

Finalist, ETHGlobal Agentic Ethereum (1,500 hackers, 90 countries)

Feb 2025

Best DApp on Rootstock, Encode Club Bangkok Bitcoin Hackathon for BitMate

Nov 2024

7 sponsor bounties, ETHGlobal ETHBangkok for Token Trek

Nov 2024

1st place, Celo Best On-Chain Funding DApp, ETHGlobal SuperHack

Aug 2024

Best Project on Ethereum, FOSSASIA Hackathon (Ethereum Foundation)

Feb 2024

Finalist, ETHGlobal LFGHO (800 hackers, 72 countries)

Jan 2024

SKILLS

Languages: TypeScript, JavaScript, Python, C

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, Material UI, Zustand, TanStack, dnd-kit, GSAP, Sass

Backend & Data: Node.js, Express, NestJS, Prisma, PostgreSQL, MongoDB

AI: LangChain, LangFlow, Model Context Protocol (MCP)

Web3 & Tools: wagmi, EVM chains, Sui, Rootstock, World ID, Lit Protocol, Git, Docker, Linux, Figma

LEADERSHIP & EDUCATION

Chapter Lead, *Google Developer Student Clubs*

Jul 2023 – Aug 2024

- Led a team of student developers building open-source projects and organized technical workshops for **500+ community members**.

B.Tech, Computer Science & IT, *Marri Laxman Reddy Institute of Technology and Management*, Hyderabad

2021 – 2025
